

cleantech Aero

Aero backpack vacuum cleaners are the most fully featured backvacs you can buy. It is fitted with an industrial strength vacuum motor and thermal overload protection to ensure that you get the carefree, long life service you expect. The Aero has been carefully designed in co-operation with cleaning professionals and workplace ergonomists to give you a backpack vacuum cleaner that is both very effective and outstandingly comfortable. It is very light, weighing in at only 4.2 kg.

The ergonomic, ventilated moulded back support and fully adjustable waist harness, positions the machine so it sits comfortably on your hips without interfering with your freedom of movement. The shoulder straps are flexible so that they stretch easily for extra comfort. The Aero is suitable for both left and right handed operation.

Dust Filtration

Aeros have a four-stage filtration system to give you one of the highest levels of dust retention. If you use the optional HEPA allergy filter, you can capture in excess of 99.99% of dust particles. Each machine comes with a re-usable cloth dust bag that is large enough for commercial cleaning. As well, the Aero may be fitted with paper dust bags that enclose the captured dust so that you can dispose of them with the least mess.

motor	1100w / 240v
airflow	45.6 l/sec @ 40mm orifice
waterlift	2300mm @ closed orifice
